VitalSigns[®] 2019

Introduction

The nation-wide Vital Signs program is a Community of Foundations Canada initiative that seeks to improve the quality of life in Canada's communities.

In the past, the reports have provided a comprehensive look at how our communities are faring in key quality-of-life areas. The 2019 report represents Vancouver Foundation's first 'themed' report, with a focus on *Community Participation and Contribution*.

Mustel Group was commissioned by Vancouver Foundation to conduct the 2019 BC Vital Signs survey, with the Foundation coordinating and encouraging the participation of other BC community foundations in the research. The goal of this work is to delve deeper into the various ways people are contributing to their communities and explore difference between generations.

Vital Signs survey methodology

The 2019 Vital Signs Survey was completed on-line by 7,980 BC residents. A link to the survey was distributed by BC's Community Foundations and was also sent to Mustel Group's panelists, and to one of their panel partners (Asking Canadians) panelists. Approximately 70% of interviews were collected by Mustel Group and 30% by community foundations, including Vancouver Foundation.

Respondents were provided their choice of English or Chinese to complete the survey. The final sample was weighted to match Statistics Canada census data on the basis of gender, age, and region of residence.

To enable Community Foundations to review the findings for the communities they serve, major centres where the foundations are located were listed in the survey for residents to select from. Those residing in smaller surrounding communities were asked to select the centre they live closest to.

How to read this report

- Questions that were also asked as part of the 2016 survey are shown with data for both years
- Only responses of 30 or more have been shown. In some cases, responses for some questions were not high enough to report on
- Rounding and 'prefer not to say' responses may result in numbers not adding up to 100%
- Some responses included 'select all that apply' or 'select up to three options'
- Responses have been presented in the order of the provincial findings.
